- Anyone who needs to tighten body tissue
- Dieters who want to lose inches from the right places first
- Teenagers who need some positive help with their figures
- Excellent for Psoriasis & Eczema
- Men and women who want to look terrific - FAST

## The wrap is a marvellous treatment to tighten and tone the skin resulting in lasting inch loss

A course of wraps is often recommended, these should be taken 7/10 days apart. Inch loss is accumulative, and most clients should lose around 25" over three wraps (depending on their size!) It is quite normal for a client to come down a complete dress size, without losing a pound in weight, over three wraps. Clients dieting would have even better results.

Larger clients, or even clients that are rather 'solid' in certain areas, (normally thighs and buttocks) would definitely benefit from a course of wraps as this area needs 'breaking down' and it is impossible to get maximum results in only one treatment.

Because, the inches firmed and toned off your body do NOT return after a few glasses of water (or cups of tea!) it is obvious we can only wrap someone a limited number of times before they are, what we called 'wrapped out'. Wrapped out means the point at which we have accumulated and accomplished all the significant results that we are basically going to achieve as far as inch loss goes.

It really depends upon the size of the client and their lifestyle as to how many wraps that client may have before being 'wrapped out'. In order to achieve further inch loss, the client would have to diet.

However, even though you may become wrapped out, further wraps will certainly continue to benefit the skin by deep cleansing, contouring and tightening the soft fatty tissue and are also excellent for detoxification on a regular basis. Many clients will also experience a sense of "well being".

In order to maintain your shape and inch loss we recommend having a wrap once every 2 months.

## For maximum results, we would advise you to try and follow these afterwrap instructions.

Because of the amount of inch loss that has occurred through the tissue compacting and tightening, it will take a week or so for your skin to adapt to this amount of tissue inch loss.

Although, your treatment in the salon has been completed, the clay solution is still in your skin, and the detoxification and tightening process can continue for 3-4 days giving further inch loss.

You can greatly assist this skin tightening process by retaining the solution in the pores, showering with tepid water only. Limit the soap to under arm and groin and feet areas only, you do not want to soap the solution out of the pores. Creams and lotions that could be absorbed into the pores and inhibit the desired action of the retained solution should also be avoided. The wrap is great for dry skin - you should not need lotions for a few days.

Following this procedure for the next 3/4 days will greatly assist the total visual result of the skin, and this will continue to improve for the next week or two. After 3/4 days hot showers and plenty of soap on the entire body will open the pores and eliminate the solution and toxins on which it has continued to act. There will NOT be any body odour problems for 3/4 days of clay solution retention.

After your wrap you should drink plenty of water, either mineral or tap water is fine - but NOT carbonated mineral water. Ideally, try and drink 3 pints plus a day. This helps flush and rid your body of the impurities that have been broken down.

## If you can avoid things that are fairly toxic for a 3/4 day period, this will help greatly, they are:

TEA  
COFFEE  
SUGAR  
SALT  
CARBONATED DRINKS  
ALCOHOL  
FRIED AND FATTY FOODS

If you drink a lot of tea or coffee and you cut this out completely you may experience headaches we would normally advise clients that have a high caffeine intake to cut down rather than cut out. For example, if you normally drink from a mug, have a cup instead etc.

The most important instruction to follow is - to drink plenty of water.

## GUARANTEE

All customers having their first full body wrap are entitled to the following guarantee.

That you should lose a minimum of 6" or you will not be charged and that you should maintain a loss of at least 6" for a period of 30 days or we will wrap you again free of charge.

This is conditional on you following the "After Wrap Instructions" and not gaining any extra weight, (and thereby new inches) for the 30 days following your wrap.

To qualify for this guarantee, you have the right to return to the salon on the 30th day after your wrap to be re-measured and weighed if required.

This guarantee only applies to clients having a full body wrap, no guarantees can be given to clients having 'partial' wraps.
