

ST. TROPEZ
The Ultimate Tan

ST. TROPEZ UK
Treatment Advice for the Client

Pre

If prone to allergic reaction or have especially sensitive skin, ask your therapist for a patch test.

Avoid any other self-tanning product for a minimum period of 4 days prior to your appointment.

Waxing or shaving should be completed at least 24 hours prior to the treatment.

Loose dark clothing should be worn together with a dark coloured bra or, preferably, no bra at all. Please be aware that the guide colour can stain nylon and wool.

Black Paper Tangas will be issued upon arrival. After treatment it is advisable to wear these at home underneath loose-fitting clothing.

It is preferable not to wear any perfume, deodorant or aromatherapy oils, as these will all affect the treatment.

Aftercare

Do not shower or bathe for a minimum of 4 hours after the treatment. The application takes time to develop.

Do not take part in any activity, which may cause perspiration for at least 12 hours after the treatment.

Swimming - It is advisable not to swim for at least 12 hours after the treatment. Please be aware that chemicals in swimming pools may bleach the colour, as is the case with a normal tan. It is suggested that when leaving the pool, you mix the Auto-Bronzant and Body Moisturiser together and apply as body lotion.

Do not use any perfume, deodorant or aromatherapy oils until you have taken advice from your therapist.

It is fine to leave the guide colour on overnight and shower in the morning. If a little colour does appear on your bed linen, it is just vegetable dye and will wash out of cotton.

Depth of Tan

Once St. Tropez has developed, it will give you a golden glow. To obtain a darker shade, a second or third application may be required. This can be done at home. Your own skin tone will determine the depth of tan.
